Shannon,

Thank you for your reply, while you are preparing additional information, please forward to me the information that was presented at the last CAG meeting. As additional information is developed we will be happy to review that as well.

Thank you,

Scott Heck

Dear Mr. Heck,

I am drafting a formal response to your aforementioned email requests and letter, and will send it to your office when it is complete.

EWA is currently preparing additional material, due to the significant nature of the discoveries made during our June 15, 2017 emergency sampling event, and would be willing to meet with Mayor Speer, the Borough's technical team, and the USEPA to discuss this and other matters.

Respectfully,

Shannon Lisa
Program Director

Edison Wetlands Association

Shannon,

Below are my email requests for information from the last CAG meeting. I have asked our Environmental team to review the power point, reports and information presented by you and Dr. Defur at the last CAG meeting. Can you let me know when this information will be available so that it can be reviewed?

Thank you,

Scott Heck, CPWM

Bob:

I tried to return your call this morning and could not leave a message as your message box was full.

I received a copy of the e-mail you sent on July 4, 2017 addressed to "Ms. Hunter" (I assume you meant Ms. Huber, my assistant, who sent my letter dated June 30, 2017 to you via electronic email).

It was the Borough's understanding that Dr. DeFur is the Technical Advisor for the Ringwood CAG and that the materials referenced during the June 19 2017 CAG meeting would be posted to either or both the websites for Edison Wetlands Association and Environmental Stewardship Concepts. However, to date nothing has been posted on either website, hence the reason for my June 30th letter which was addressed and sent to both you and Dr. DeFur.

As there was over a one year hiatus between CAG meetings, the Borough was familiar with Dana Patterson and Shannon Lisa is new to the Borough. In the future, as requested, we will also copy Ms. Lisa on communications with EWA. Please provide a copy of Ms. Lisa's resume/credentials as it would be helpful to understand her educational and professional background related to the environmental issues being discussed for the Ringwood site.

Although EPA has provided copies of some of the information requested in my June 30th letter to you, please provide copies of the balance of the materials including:

1. Sign in sheet from the June 19, 2017 CAG meeting;
2. EWA Power Point Presentation prepared by Ms. Lisa;
3. Letter from EWA to North Jersey District Water Supply Commission requesting that they attend the June 19th Ringwood CAG meeting; and
4. All laboratory data/analysis, including Quality Assurance/Quality Control, Chain of Custody documentation, raw analytical datasheets of sampling conducted by EWA of the seeps in and around PMP on or about June 15th. In your July 4th email, you mention that EWA has conducted "several recent sampling events". Please provide the dates for all such recent sampling events and documentation requested for each event.

After the Borough and its environmental professionals have reviewed this information, it may be beneficial to have a conference call with the technical consultants. Should you have any questions, please feel free to contact me.

Thank you,

Scott Heck, CPWM

Dear Ms. Hunter,

Thank you for your inquiry regarding several EWA produced materials, please be aware of the following items. Dr. Peter deFur cannot release any EWA related work products in any form without our express direction so in the future on direct your requests to Shannon Lisa, EWA Toxics Program manager or myself.

Please include Senior Scientist and Toxics Program Manager Shannon Lisa on all Ringwood related requests as she is in expert on all things ground and surface water as well as the fate and transport of 1-4 dioxane. Ms. Lisa also has extensive background and knowledge in health based questionnaires and consults nation wide on these matters.

Ms. Lisa personally reviewed the entire 5600 plus page Corner Stone Report Groundwater Report and all Q/A, Q/C associated with the report. Ms. Lisa is also prepared the PowerPoint presentation as well as compiled extensive toxicological data on 1,4-dioxane and all known research on both the volatile and semi-volatile testing methods.

In the interest of working cooperatively, I suggest we conduct a phone call this afternoon to discuss our several recent sampling events and how we can work together moving forward. I would also request Ringwood Borough include their environmental expert Lawra Dodge from Excel Environmental on the call this afternoon.

Please provide me with times that you are available and I will send an agenda for the call.

Respectfully,
Robert Spiegel
Executive Director
Edison Wetlands Association
